Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 2, 7, 10, 15, 16, 18 and 23-37 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Gray (3,772,203) of PTO-1449 or BO in view of Schmitt (3,866,800).

Applicants' remarks regarding the combination of the prior art, Gray in view of Schmitt, does not teach the post-foaming shave gel are not persuasive since the prior art, especially Schmitt, teaches two separate components comprising a) an oxidant-containing composition and b) a reductant-containing composition is old in the art. Again, one of ordinary skill in the art would have been motivated to prepare a post-forming gel composition comprising water, surfactant, self-foaming agent in a container/dispenser wherein a chemical reaction incident to the mixing of the reagents provide exothermic heat and wherein the chemical reaction is between a thiosulfate and hydrogen peroxide. Applicants have not demonstrated on the record any side-by-side comparison of the present invention's post-foaming shave gel composition is superior over the prior art's.

The rejection made under 35 USC 103(a) is adhered to.

Claims 1, 2, 7, 10, 15, 16, 18 and 23-27 are not allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
